Smell Communication

A smell-based system called Dollars & Scents inside the entrance to their laboratory at MIT

- The system releases scents and perfumes into the air differently depending on stock market changes.
- Emit a lemon-like fragrance if NASDAQ index is going down, while they emit a rose-like fragrance if the stock market is going up.
- Similarly, they also built an olfaction system, called inStink, for conveying ambient presence and activity awareness for food.

Smell Communication

- Scientists uncover new connection between smell and memory
- Findings offer opportunities for improved smell tests in Alzheimer's disease diagnosis

Conceptual diagram for the formation of episodic odour memory. A model of episodic odour memory whereby information regarding odour quality and spatiotemporal context merge at the level of the AON producing cellular populations that represent previously encountered odours (what) within the context in which they occurred (when and where)

Afif J. Aqrabawi, Jun Chul Kim. **Hippocampal projections to the anterior olfactory nucleus differentially convey spatiotemporal information during episodic odour memory.** *Nature Communications*, 2018; 9 (1)
