CHATBOT

<http://knowledge.wharton.upenn.edu/article/rise-chatbots-time-embrace/>

“A chatbot (also known as a talkbot, chatterbot, Bot, chatterbox, Artificial Conversational Entity) is a computer program which conducts a conversation via auditory or textual methods.”

<https://en.wikipedia.org/wiki/Chatbot>

MACHINE LEARNING

- “Machine learning is the subfield of computer science that gives computers the ability to learn without being explicitly programmed” (Arthur Samuel, 1959).
- “Evolved from the study of pattern recognition and computational learning theory in artificial intelligence,[2] machine learning explores the study and construction of algorithms that can learn from and make predictions on data” Ron Kohavi; Foster Provost (1998). "Glossary of terms". Machine Learning. 30: 271-274.

DEEP LEARNING

- “Deep learning (also known as deep structured learning, hierarchical learning or deep machine learning) is a branch of machine learning based on a set of algorithms that attempt to model high level abstractions in data.”
- “Various deep learning architectures such as deep neural networks have been applied to fields like computer vision, automatic speech recognition, and natural language processing”

https://en.wikipedia.org/wiki/Deep_learning

STARBUCKS UNVEILS CHATBOT APP (1)

- A voice-activated chatbot, called MyStarbucks Barista

Chutisant Kerdvibulvech

STARBUCKS UNVEILS CHATBOT APP (2)

- Let customers place orders by speaking, "I want a latte." The features can also be used to pay for orders.
- MyStarbucks Barista is only available to 1,000 people before a nationwide release this summer.

BOTS FOR MESSENGER: CNN (1)

- “Facebook announced at its F8 conference that it has created a platform for companies to develop the robots that mimic human conversation to run within its Messenger app”
- “Bots for Messenger enables users to get everything from weather updates to shopping notifications and personalized news as well as message companies and publishers as they do their friends.”

<http://www.brandchannel.com/2016/04/14/brand-chatbots-041416/>

Chutisant Kerdvibulvech

BOTS FOR MESSENGER: CNN (2)

- “Launch partners include shopping app Spring, HP and CNN.”

DEEPA DREAM

- DeepDream is a computer vision program created by Google
- Using a convolutional neural network to find and enhance patterns in images via algorithmic pareidolia
- Creating a dream-like hallucinogenic appearance in the deliberately over-processed images

Chutisant Kerdvibulvech

INTEGRATED GROUP PROJECT

- Deep Dream
- GANpaint
