

Technology and Innovative Communication Management for Limitless Development

Chutisant Kerdvibulvech, Ph.D.
Assistant Professor

ผศ.ดร.ชุตินันต์ เกดวิบูลย์เวช

CM 8002 Innovative Communication Management
(นวัตกรรมการจัดการทางการสื่อสาร)

Overview

- Background
- Cyber Technological Trends for Media
- Innovative ICT Management by Future Technologies

<http://gscm.nida.ac.th/~chutisant/NIDA-CM8002.pdf>

2

Asst. Prof. Dr. Chutisant Kerdvibulvech

Education

www.chula.ac.th/

- B.E. (Hons) in Computer Engineering
Chulalongkorn University

www.keio.ac.jp

- MSc. / Ph.D. in Engineering, Department of Information and Computer Science
Keio University, the oldest university in Japan

3

Asst. Prof. Dr. Chutisant Kerdvibulvech

Academic Work Experience

- Teaching and being as a research committee in following universities, such as
 - Rangsit University, Sripatum University, PIM
 - Chulalongkorn University, Mahidol University, Kasetsart University
 - NIDA
- Technical Committees for many academic international conferences and journals (Scopus and Scimago)

4

Asst. Prof. Dr. Chutisant Kerdvibulvech

Media Work Experience (1/3)

1. Newspapers

5 Asst. Prof. Dr. Chutisant Kerdvibulvech

Media Work Experience (2/3)

2. Magazines

- Columnist for Manager 360° Magazine, iTech 360°

- Columnist for e-commerce Magazine, Augmented Reality

6 Asst. Prof. Dr. Chutisant Kerdvibulvech

Media Work Experience (3/3)

3. Televisions

- IT News Analyst for Nation Channel TV Program

- IT News Analyst for RSU TV Channel

7 Asst. Prof. Dr. Chutisant Kerdvibulvech

Innovative ICT Management by Future Technologies

Digital Media

Digital media are any media that are encoded in a machine-readable format. [*Technology Brief*. University of Guelph.]

1. Digital Imagery / Digital Video
2. Web Pages / Websites
3. Digital Audio, e.g. mp3s
4. e-books
5. Social Media

www.linkedin.com

Important Role of Digital Media

Online video has become ubiquitous, digital media consumption has become the norm.

Facts about Digital Media

1. Viewers are heavily engaged with digital media – less so with linear television and newspaper.
2. Television and newspaper still matter, but it can no longer succeed as a stand alone platform.

Digital Media Trends and the Future of
Television, Dr. Seth Geiger,
President SmithGeiger LLC (CA, USA)

<https://www.linkedin.com/>

Trends for Digital Media Trends for 2014

Active monthly users of the 'big 9'

As at 15 November 2013 (multiple sources cited)
*Kamber does not process active monthly user data and this figure is based on an estimate from
Twitter's last reported data. Twitter's last reported data was 70m active monthly users.

14 Social Media Trends for 2014

Kamber.com.au 14

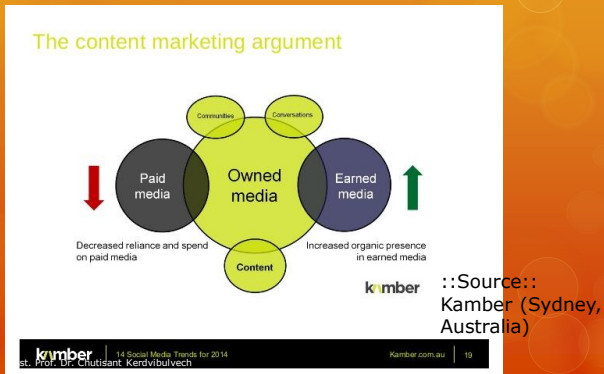

Mobile Phone As Home Computer

- Mobile Phone as PC
- Mobile phones are the new computer
- Designing website/social media for mobile phones is undoubtedly essential

voices.sundtimes.com

Paid Media / Earned Media

13

Creative-Digital Economy

- Placement: Its where young (and old) people are
- Price to invest: Minimal
- But..
 - Easy to build innovatively
 - Create HUGE profits

14

Asst. Prof. Dr. Chutisat Kerdvibulvech

New Viewpoint Analysis

Prof. Takeo Kanade,
Carnegie Mellon University (CMU),
United States

Super Bowl

- Football fans treated to a unique new view of the action during playbacks
- CBS Television used a new technology
- Carnegie Mellon University computer vision expert, Prof. Takeo Kanade

23

Asst. Prof. Dr. Chutisart Kendivulvech

Super Bowl

- "Eye Vision"
- Involves shooting multiple video images of a dynamic event, such as a football game, from multiple cameras placed at different angles
- The video streams from these cameras are combined by computer and the resulting images reach viewers in a format that will make them feel as if they are flying through the scenes they see.

24

Eye Vision from Prof.
Takeo Kanade, CMU

10

The Matrix

www.imdb.com

- "Virtualized Reality"
- People will be able to customize the perspective from which they watch, for example, from that of a particular object.

25

Asst. Prof. Dr. Chutisant Kerdvibulvech

11

New Viewpoint Analysis

Augmented Reality

What is Augmented Reality (AR)?

- A combination of a real scene viewed by a user and a virtual scene generated by a computer that augments the scene with additional information.
- Generates a composite view for the user.

27

Asst. Prof. Dr. Chutisant Kerdvibulvech

What is the Goal of AR?

- To enhance a person's performance and perception of the world
- But, what is the ultimate goal?

28

"Augmented reality in urban places: contested content and the duplicity of code." Transactions of the Institute of British Geographers, 2012

The Ultimate Goal of AR

- Create a system such that no user CANNOT tell the difference between the real world and the virtual augmentation of it.

AR in Commerce

Geek.com

29

Asst. Prof. Dr. Chutisant Kerdvibulvech

Augmented Reality vs. Virtual Reality

Augmented Reality

- System augments the real world scene
- User maintains a sense of presence in real world
- Needs a mechanism to combine virtual and real worlds

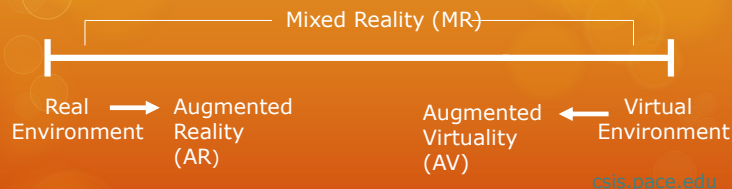

Virtual Reality:

- Totally immersive environment
- Visual senses are under control of system

30

Asst. Prof. Dr. Chutisant Kerdvibulvech

Miligram's Reality-Virtuality Continuum

Miligram coined the term "Augmented Virtuality" to identify systems which are mostly synthetic with some real world imagery added such as texture mapping video onto virtual objects.

Augmented Reality is closest to the real world because mainly a user is perceiving the real world with just a little computer generated data.

31

Asst. Prof. Dr. Chutisant Kerdvibulvech

Combining the Real and Virtual Worlds

We need:

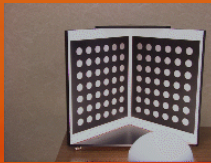

- Precise models
- Locations and optical properties of the viewer (or camera) and the display
- Calibration of all devices
- To combine all local coordinate systems centered on the devices and the objects in the scene in a global coordinate system

32

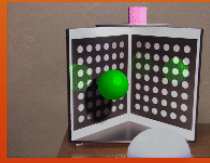

Asst. Prof. Dr. Chutisant Kerdvibulvech

Combining the Real and Virtual Worlds (cont)

- Register models of all 3D objects of interest with their counterparts in the scene
- Track the objects over time when the user moves and interacts with the scene

real world

real world with virtual objects and inter-reflections and virtual shading

33

Asst. Prof. Dr. Chutisant Kerdvibulvech

Mixed Reality

- Human pacman: A mobile wide-area entertainment system based on physical, social, and ubiquitous computing

1

Dr. Adrian Cheok,
National University of Singapore
(NUS)
at Singapore

Broadcast in Discovery Channel

34

Asst. Prof. Dr. Chutisant Kerdvibulvech

This image depicts an artist's conception of a mixed reality enhanced book. The reader is able to read the actual book, but simultaneously see three dimensional computer graphics co-located with, and in registration with the book.

www.sony.com.co.jp

35

Asst. Prof. Dr. Chutisant Kerdvibulvech

Realistic Merging

Requires:

- Objects to behave in physically plausible manners when manipulated
- Occlusion
- Collision detection
- Shadows

**All of this requires a very detailed description of the physical scene

36

Asst. Prof. Dr. Chutisant Kerdvibulvech

Research Activities

- Develop methods to register the two distinct sets of images and keep them registered in real-time
 - New work in this area has started to use Computer Vision (CV) techniques
- Develop new display technologies for merging the two images

37 Asst. Prof. Dr. Chutisant Kerdvibulvech

Performance Issues

Augmented Reality systems are expected:

- To run in real-time so that the user can move around freely in the environment
- Show a properly rendered augmented image

Therefore, two performance criteria are placed on the system:

- Update rate for generating the augmenting image
- Accuracy of the registration of the real and virtual image

38 Asst. Prof. Dr. Chutisant Kerdvibulvech

Failures in Registration

Failures in registration due to:

- Noise
 - Position and pose of camera with respect to the real scene
 - Fluctuations of values while the system is running
- Time delays
 - In calculating the camera position
 - In calculating the correct alignment of the graphics camera

39 Asst. Prof. Dr. Chutisant Kerdvibulvech

Applications

- Medical
- Military Training
- Hazard Detection
- Engineering Design
- Robotics and Telerobotics
- Training
- Sports
- Tourism
- Video conferencing

40 Asst. Prof. Dr. Chutisant Kerdvibulvech

Applications (cont.)

- Entertainment, Computer Games
- Manufacturing, Maintenance, and Repair
- Consumer Design
- Audio
- Education
- Architecture
- Human welfare

41

Asst. Prof. Dr. Chutisant Kerdvibulvech

Recent Augmented Reality Applications

Sixth Sense

Sixth Sense

- A wearable gestural interface that augments the physical world around us with digital information
- Let us use natural hand gestures to interact with that information
- The SixthSense prototype is comprised of a pocket projector, a mirror and a camera.

44

Asst. Prof. Dr. Chutisant Kerdvibulvech

Sixth Sense in 21st Century

Dr. Pattie Maes,
Massachusetts Institute of
Technology
(MIT), United States

Broadcast in TED

45

Asst. Prof. Dr. Chutisant Kerdvibulvech

2

Detail of Sixth Sense

- Sixth Sense allows people to use the internet without a screen or a keyboard
- It can turn any surface into a touch screen
- It is made with store-bought components
- *"The software program processes the video stream data captured by the camera and tracks the locations of the colored markers [that you wear on your fingers] using simple computer-vision techniques"...*from MIT Media Lab

46

Asst. Prof. Dr. Chutisant Kerdvibulvech

Detail of Sixth Sense

- The device recognizes items in stores, and then gathers and projects information about products to the user.
- It also is able to provide quick signals to let users know what the best products are based on their needs.
- Recognize articles in newspapers, retrieve the latest related stories or video from the Internet and then display them on pages for the user

47 Say goodbye to your encyclopedia

Asst. Prof. Dr. Chutisant Kerdvibulvech

Cost of Sixth Sense

- Only \$350 dollars, around 12,000 baht
- From an educator's stand point, this is minimum given the amount of money spent on textbooks, computer labs and LCD projectors.
- For educator's, Sixth Sense would be a way to put technology (literally) into each student's hands, because of its size and its cost.

48

Touch Communication

A blue fancy robotic bear was designed to relieve pain for kids in the Wired Magazine

Sarah Fallon, A Blue Robotic Bear to Make Sick Kids Feel Less Blue, the Wired Magazine, March 2015.

Chutisant Kerdvibulvech

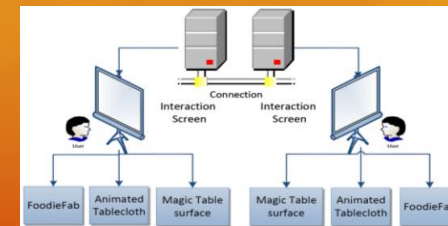

Smell Communication

A smell-based system called Dollars & Scents inside the entrance to their laboratory at MIT

- The system releases scents and perfumes into the air differently depending on stock market changes.
- Emit a lemon-like fragrance if NASDAQ index is going down, while they emit a rose-like fragrance if the stock market is going up.
- Similarly, they also built an olfaction system, called inStink, for conveying ambient presence and activity awareness for food.

Chutisant Kerdvibulvech

Taste Communication

The Food Media's system configuration is set up by [Wei13a] from National University of Singapore.

Oxford Internet Institute
Understanding life online

DPhil in Information, Communication and the Social Sciences

The DPhil in Information, Communication and the Social Sciences (doctoral) programme provides an opportunity for highly qualified students to undertake cutting edge Internet-related research. We are looking for academically excellent candidates who display the potential and enthusiasm necessary to perform research that will make a difference -- to ask important questions and to adopt innovative methodologies and approaches for exploring those questions. Many OII doctoral students are pursuing research that will shape the development of digital networked spaces and those whose lives are affected by it.

OII Research Fellow Kathryn Eccles has been appointed 'Digital Humanities Champion' for the University of Oxford. She will help develop the cross-University Digital Humanities strategy.
