

CM 8202

Seminar in New Communication Issues:
New Digital Media

Chutisant Kerdvibulvech, Ph.D.
Assistant Professor

ผศ.ดร.ชุตินันต์ เกตวิบูลย์เวช

Li

INSTRUCTOR

Asst. Prof. Dr. Chutisant Kerdvibulvech

ผศ.ดร.ชุตินันต์ เกตวิบูลย์เวช

- Email: chutisant.kernida.ac.th
- Website: www.gscm.nida.ac.th/~chutisant/
- Facebook: <https://www.facebook.com/chutisant.kerdvibulvech>
- Office: i8th Floor of Navamindradhiraj Building
(Please Email/Facebook me first to make sure that I will be there.)

Course Syllabus and Lectures

For protecting our environment, all course syllabus and lectures can be downloaded online via the following links.

- Course Syllabus
 - <http://gscm.nida.ac.th/~chutisant/PhD/CS-CM8202.pdf>
- Lectures
 - <http://gscm.nida.ac.th/~chutisant/PhD/L1-CM8202.pdf>
 - <http://gscm.nida.ac.th/~chutisant/PhD/L2-CM8202.pdf>
 - etc

Evaluation (30%)

- Assignments, Participation and Attendance
5 %
- Project
25 %
(Technique-based, Creativity-based, and Research-based)

4

Class Schedule (4+1)

ครั้งที่	วัน/เดือน/ปี	หัวข้อบรรยาย	หมายเหตุ
๑.	๑๔/๐๘	New Digital Media	มศ.ดร.จุติสันต์ เกิดวิบูลย์เวช
๒.	๒๑/๐๘	Interactive Digital Multimedia Applications	มศ.ดร.จุติสันต์ เกิดวิบูลย์เวช
๓.	๒๘/๐๘	Research-based Digital Media for Innovation	มศ.ดร.จุติสันต์ เกิดวิบูลย์เวช
๔.	๐๔/๐๙	Multidisciplinary between Information Technology and Digital Media	มศ.ดร.จุติสันต์ เกิดวิบูลย์เวช
๕.	๒๐/๑๑	Future Trends of Technology-based Digital Media	มศ.ดร.จุติสันต์ เกิดวิบูลย์เวช

Asst. Prof. Dr. Chutisant Kerdvibulvech

5

Textbooks

- Augmented Reality: A Modern Vision-Based Approach, Author: Chutisant Kerdvibulvech, ISBN 9786167687216
- จุติสันต์ เกิดวิบูลย์เวช. (2559) สื่อดิจิทัลใหม่. สื่อแห่งอนาคต. คณะนิเทศศาสตร์และนวัตกรรมการจัดการ สถาบันบัณฑิตพัฒนบริหารศาสตร์.

6

Academic Papers (Scopus)

- -C. Kerdvibulvech, "Hand Tracking by Extending Distance Transform and Hand Model in Real-time," Pattern Recognition and Image Analysis, Vol. 25, Issue 3, pp. 437441, Springer Publisher (INSPEC, SCImago Q3, Elsevier's Scopus, EiCompendex, ACM, and Google Scholar), July 2015.
- -C. Kerdvibulvech, "A Study of Interactive Digital Multimedia Applications," The Pacific-Rim Conference on Multimedia (PCM'15), Lecture Notes in Computer Science (LNCS), part I, vol. 9314 (DBLP, SCImago Q2, and Scopus), Springer International Publishing Switzerland, Gwangju, Republic of Korea, pp. 192199, September 1619, 2015.

Asst. Prof. Dr. Chutisant Kerdvibulvech

8

Overview

- Background
- From Digital Media to New Digital Media
- 3D Display / 3D Television
- Augmented Reality

Asst. Prof. Dr. Chutisant Kerdvibulvech

9

Myself

- Received PhD in Computer Engineering from Keio University, Japan (2009)
- Assistant Professor at GSCM, NIDA (2015-Now)
- Head of Department of Information and Communication Technology, Rangsit University (2009-2014)

Academic Work Experience

- Invited Lecturer and Research Committee in many universities in Thailand, such as
 - Chulalongkorn University Mahidol University
 - Sripatum University Kasetsart University
 - Panyapiwat Institute of Management
- Technical Committees for many academic international conferences and journals (Scopus and Scimago)

Asst. Prof. Dr. Chutisart Kerdibuluech

11

Media Work Experience

Newspapers

- IT Columnist for Dailynews newspaper, every Wednesday (page 23)

Asst. Prof. Dr. Chutisart Kerdibuluech

12

From Digital Media to New Digital Media

Digital Media

Digital media are any media that are encoded in a machine-readable format. [*Technology Brief*. University of Guelph.]

1. Digital Imagery / Digital Video
2. Web Pages / Websites
3. Digital Audio, e.g. mp3s
4. e-books
5. Social Media

Asst. Prof. Dr. Chutisam Kerdibuluech

14

Important Role of Digital Media

Online video has become ubiquitous, digital media consumption has become the norm.

Facts about Digital Media

1. Viewers are heavily engaged with digital media – less so with linear television and newspaper.
2. Television and newspaper still matter, but it can no longer succeed as a stand alone platform.

Trends for Digital Media Trends for 2016

<https://www.facebook.com/zuck>

Mobile Phone As Home Computer

- Mobile Phone as PC
- Mobile phones are the new computer
- Designing website/social media for mobile phones is undoubtedly essential

Asst. Prof. Dr. Chutisat Kerdvibulvech

8

Paid Media / Earned Media

The content marketing argument

Creative-Digital Economy

- Placement: Its where young (and old) people are
- Price to invest: Minimal
- But..
 - Easy to build innovatively
 - Create HUGE profits

Future of Digital Media?

- Big Data / SEO (Search Engine Optimization) / SEM (Search Engine Marketing)
- AI (Artificial Intelligence) / Deep Learning
- Reaching-Out-of-Computer
 - 3D-Display / 3D Television
 - MR (Mixed Reality) / AR (Augmented Reality) / VR (Virtual Reality)
 - New Digital Media

3D Display / 3D Television

3D Display / 3D Television

Asst. Prof. Dr. Chutisam Kerdibuluech

23

3D Display / 3D Television

A free-floating image created by firing lasers into thin air

http://www.afp.com/

3D Display / 3D Television

- 2008-Current
- Hideki Kimura
- National Museum of Emerging Science and Innovation (Miraikan), Tokyo

2014 October

3D Display / 3D Television

3D Display / 3D Television

- Miraikan is located in Odaiba, Tokyo

27

New Viewpoint Analysis

Prof. Takeo Kanade,
Carnegie Mellon University (CMU),
United States

Super Bowl

- Football fans treated to a unique new view of the action during playbacks
- CBS Television used a new technology
- Carnegie Mellon University computer vision expert, Prof. Takeo Kanade

Asst. Prof. Dr. Chutisart Kerdhuluech

29

Super Bowl

- “Eye Vision”
- Involves shooting multiple video images of a dynamic event, such as a football game, from multiple cameras placed at different angles
- The video streams from these cameras are combined by computer and the resulting images reach viewers in a format that will make them feel as if they are flying through the scenes they see.

Eye Vision from Prof.
Takeo Kanade, CMU

30

The Matrix

www.imdb.com

- “Virtualized Reality”
- People will be able to customize the perspective from which they watch, for example, from that of a particular object.

Asst. Prof. Dr. Chutisart Kerdvibulvech
New Viewpoint Analysis

31

Augmented Reality

What is Augmented Reality (AR)?

- A combination of a real scene viewed by a user and a virtual scene generated by a computer that augments the scene with additional information.
- Generates a composite view for the user.

Asst. Prof. Dr. Chutisart Kerdvibulvech

33

What is the Goal of AR?

- To enhance a person's performance and perception of the world
- But, what is the ultimate goal?

Augmented reality in urban places connects citizens and the environment.
Transactions of the Institute of British Geographers, 2012

34

The Ultimate Goal of AR

- Create a system such that no user CANNOT tell the difference between the real world and the virtual augmentation of it.

AR in Commerce Geek.com

Asst. Prof. Dr. Chutisart Kerdvibulvech

35

Augmented Reality vs. Virtual Reality

Augmented Reality

- System augments the real world scene
- User maintains a sense of presence in real world
- Needs a mechanism to combine virtual and real worlds

Virtual Reality:

- Totally immersive environment
- Visual senses are under control of system

Asst. Prof. Dr. Chutisart Kerdvibulvech

36

Miligram's Reality-Virtuality Continuum

Milgram coined the term "Augmented Virtuality" to identify systems which are mostly synthetic with some real world imagery added such as texture mapping video onto virtual objects.

Augmented Reality is closest to the real world because mainly a user is perceiving the real world with just a little computer

Asst. Prof. Dr. Chutisart Kerdibuluech

37

Combining the Real and Virtual Worlds

We need:

- Precise models
- Locations and optical properties of the viewer (or camera) and the display
- Calibration of all devices
- To combine all local coordinate systems centered on the devices and the objects in the scene in a global coordinate system

Asst. Prof. Dr. Chutisart Kerdibuluech

38

Combining the Real and Virtual Worlds (cont)

- Register models of all 3D objects of interest with their counterparts in the scene
- Track the objects over time when the user moves and interacts with the scene

real world

real world with virtual objects and inter-reflections and virtual shading

39

Mixed Reality

- Human pacman: A mobile wide-area entertainment system based on physical, social, and ubiquitous computing

Journal: Personal and Ubiquitous Computing

Dr. Adrian Cheok,
National University of Singapore (NUS)
at Singapore

Broadcast in Discovery Channel

40

Asst. Prof. Dr. Chaitant Kerdvibulvech

This image depicts and artist's conception of a mixed reality enhanced book. The reader is able to read the actual book, but simultaneously see three dimensional computer graphics co-located with, and in registration with the book.

41

Asst. Prof. Dr. Chaitant Kerdvibulvech

Realistic Merging

Requires:

- Objects to behave in physically plausible manners when manipulated
- Occlusion
- Collision detection
- Shadows

**All of this requires a very detailed description of the physical scene

Asst. Prof. Dr. Chaitant Kerdvibulvech

42

Research Activities

- Develop methods to register the two distinct sets of images and keep them registered in real-time
 - New work in this area has started to use Computer Vision (CV) techniques
- Develop new display technologies for merging the two images

Asst. Prof. Dr. Chutisart Kerdvibulvech

43

Performance Issues

Augmented Reality systems are expected:

- To run in real-time so that the user can move around freely in the environment
- Show a properly rendered augmented image

Therefore, two performance criteria are placed on the system:

- Update rate for generating the augmenting image
- Accuracy of the registration of the real and virtual image

Asst. Prof. Dr. Chutisart Kerdvibulvech

44

Failures in Registration

Failures in registration due to:

- Noise
 - Position and pose of camera with respect to the real scene
 - Fluctuations of values while the system is running
- Time delays
 - In calculating the camera position
 - In calculating the correct alignment of the graphics camera

Asst. Prof. Dr. Chutisart Kerdvibulvech

45

Applications

- Medical
- Military Training
- Hazard Detection
- Engineering Design
- Robotics and Telerobotics
- Training
- Sports
- Tourism
- Video conferencing

Asst. Prof. Dr. Chutisart Kerdvibulvech

46

Applications (cont.)

- Entertainment, Computer Games
- Manufacturing, Maintenance, and Repair
- Consumer Design
- Audio
- Education
- Architecture
- Human welfare

Asst. Prof. Dr. Chutisart Kerdvibulvech

47

Interactive Digital Multimedia Applications

Asst. Prof. Dr. Chutisart Kerdvibulvech

48

Augmented Reality Applications

Sixth Sense

Sixth Sense

- A wearable gestural interface that augments the physical world around us with digital information
- Let us use natural hand gestures to interact with that information
- The SixthSense prototype is comprised of a pocket projector, a mirror and a camera.

Asst. Prof. Dr. Chutisart Kerdvibulvech

51

Sixth Sense in 21st Century

Dr. Pattie Maes,
Massachusetts Institute of Technology
(MIT), United States

Broadcast in TED

Asst. Prof. Dr. Chaitisam Kerdvibulvech

52

Detail of Sixth Sense

- Sixth Sense allows people to use the internet without a screen or a keyboard
- It can turn any surface into a touch screen
- It is made with store-bought components
- *"The software program processes the video stream data captured by the camera and tracks the locations of the colored markers [that you wear on your fingers] using simple computer-vision techniques" .from MIT Media Lab*

Asst. Prof. Dr. Chaitisam Kerdvibulvech

53

Detail of Sixth Sense

- The device recognizes items in stores, and then gathers and projects information about products to the user.
- It also is able to provide quick signals to let users know what the best products are based on their needs."
- Recognize articles in newspapers, retrieve the latest related stories or video from the Internet and then display them on pages for the user
- Say goodbye to your encyclopedia

Asst. Prof. Dr. Chaitisam Kerdvibulvech

54

Cost of Sixth Sense

- Only \$350 dollars, around 12,000 baht
- From an educator's stand point, this is minimum given the amount of money spent on textbooks, computer labs and LCD projectors.
- For educator's, Sixth Sense would be a way to put technology (literally) into each student's hands, because of its size and its cost.

Asst. Prof. Dr. Chutisant Kerdvibulvech

55

Augmented Reality Guitar

Augmented Reality Guitar

Dr. Chutisant Kerdvibulvech,
Keio University, Japan
Broadcast in Discovery Channel

Asst. Prof. Dr. Chutisant Kerdvibulvech

57

Thank you

Asst. Prof. Dr. Chutisant Kerdvibulvech
