

CM 8202
Seminar in New Communication Issues:
New Digital Media

Chutisant Kerdvibulvech, Ph.D.
Associate Professor

รศ.ดร.ชุตินันต์ เกตวิบูลย์เวช

L1

INSTRUCTOR

Assoc. Prof. Dr. Chutisant Kerdvibulvech

รศ.ดร.ชุตินันต์ เกตวิบูลย์เวช

- Email: chutisant.ker@nida.ac.th
- Website: www.gscm.nida.ac.th/~chutisant/
- Facebook: <https://www.facebook.com/chutisant.kerdvibulvech>
- Office: 8th Floor
(Please Email/Facebook me first to make sure that I will be there.)

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Course Syllabus and Lectures

For protecting our environment, all course syllabus and lectures can be downloaded online via the following links.

- Course Syllabus
 - <http://gscm.nida.ac.th/~chutisant/PhD/CS-CM8202.pdf>
- Lectures
 - <http://gscm.nida.ac.th/~chutisant/PhD/L1-CM8202.pdf>
 - <http://gscm.nida.ac.th/~chutisant/PhD/L2-CM8202.pdf>
 - etc

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Evaluation (33.33%)

- Assignments, Participation and Attendance
3.33 %
- Project
30 %
(Technique-based, Creativity-based, and Research-based)

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Class Schedule (5)

๑.	New Digital Media	ผศ.ดร.ชุตินันต์ เกตวิบูลย์เวช
๒.	Interactive Digital Multimedia Applications	ผศ.ดร.ชุตินันต์ เกตวิบูลย์เวช
๓.	Research-based Digital Media for Innovation	ผศ.ดร.ชุตินันต์ เกตวิบูลย์เวช
๔.	Multidisciplinary between IT & Digital Media	ผศ.ดร.ชุตินันต์ เกตวิบูลย์เวช
๕.	Future Trends of Technology-based Digital Media	ผศ.ดร.ชุตินันต์ เกตวิบูลย์เวช

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Textbooks

- Augmented Reality: A Modern Vision-Based Approach, Author: Chutisant Kerdvibulvech, ISBN 9786167687216
- ชุตินันต์ เกตวิบูลย์เวช. (2559) สื่อดิจิทัลใหม่..สื่อแห่งอนาคต. คณะนิเทศศาสตร์และนวัตกรรมการจัดการ สถาบันบัณฑิตพัฒนบริหารศาสตร์.
- ชุตินันต์ เกตวิบูลย์เวช. (2560) พิมพ์ครั้งที่ 2, สื่อดิจิทัลใหม่..สื่อแห่งอนาคต. คณะนิเทศศาสตร์และนวัตกรรมการจัดการ สถาบันบัณฑิตพัฒนบริหารศาสตร์.

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Academic Papers (Scopus)

- -C. Kerdvibulvech, "Hand Tracking by Extending Distance Transform and Hand Model in Real-time," Pattern Recognition and Image Analysis, Vol. 25, Issue 3, pp. 437441, Springer Publisher (INSPEC, SCImago Q3, Elsevier's Scopus, EiCompendex, ACM, and Google Scholar), July 2015.
- -C. Kerdvibulvech, "A Study of Interactive Digital Multimedia Applications," The Pacific-Rim Conference on Multimedia (PCM'15), Lecture Notes in Computer Science (LNCS), part I, vol. 9314 (DBLP, SCImago Q2, and Scopus), Springer International Publishing Switzerland, Gwangju, Republic of Korea, pp. 192199, September 1619, 2015.

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Overview

- Background
- From Digital Media to New Digital Media
- 3D Display / 3D Television
- Augmented Reality

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Myself

- Received PhD in Computer Engineering from Keio University, Japan (2009)
- Assistant Professor at GSCM, NIDA (2015-Now)
- Head of Department of Information and Communication Technology, Rangsit University (2009-2014)

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Academic Work Experience

- Invited Lecturer and Research Committee in many universities in Thailand, such as
 - Chulalongkorn University
 - Sripatum University
 - Panyapiwat Institute of Management
 - Mahidol University
 - Kasetsart University
- Technical Committees for many academic international conferences and journals (Scopus and Scimago)

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Media Work Experience

Newspapers

- IT Columnist for Dailynews newspaper, every Wednesday (page 23)

Assoc. Prof. Dr. Chutisant Kerdvibulvech

From Digital Media to New Digital Media

Digital Media

Digital media are any media that are encoded in a machine-readable format. [Technology Brief, University of Guelph.]

1. Digital Imagery / Digital Video
2. Web Pages / Websites
3. Digital Audio, e.g. mp3s
4. e-books
5. Social Media

www.linkedin.com

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Important Role of Digital Media

Online video has become ubiquitous, digital media consumption has become the norm.

Facts about Digital Media

1. Viewers are heavily engaged with digital media – less so with linear television and newspaper.
2. Television and newspaper still matter, but it can no longer succeed as a stand alone platform.

Digital Media Trends for 2014

Active monthly users of the 'big 9'

As at 15 November 2013 (multiple sources cited)
*tumblr does not release active monthly user data and this figure is based on an estimate from
http://www.tumblr.com/about/faq. All other figures are based on data from the same source.

Mobile Phone As Home Computer

- Mobile Phone as PC
- Mobile phones are the new computer
- Designing website/social media for mobile phones is undoubtedly essential

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Paid Media / Earned Media

Creative-Digital Economy

- Placement: Its where young (and old) people are
- Price to invest: Minimal
- But..
 - Easy to build innovatively
 - Create HUGE profits

Assoc. Prof. Dr. Chutisant Kerdvibulvech
<http://www.dailynews.co.th/>

Future of Digital Media?

www.afp.com.au

- Big Data / SEO (Search Engine Optimization) / SEM (Search Engine Marketing)
- AI (Artificial Intelligence) / Deep Learning
- Reaching-Out-of-Computer
 - 3D-Display / 3D Television
 - MR (Mixed Reality) / AR (Augmented Reality) / VR (Virtual Reality)
 - New Digital Media

Assoc. Prof. Dr. Chutisant Kerdvibulvech

3D Display / 3D Television

3D Display / 3D Television

New Viewpoint Analysis

Prof. Takeo Kanade,
Carnegie Mellon University (CMU),
United States

Super Bowl

- Football fans treated to a unique new view of the action during playbacks
- CBS Television used a new technology
- Carnegie Mellon University computer vision expert, Prof. Takeo Kanade

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Super Bowl

- “Eye Vision”
- Involves shooting multiple video images of a dynamic event, such as a football game, from multiple cameras placed at different angles
- The video streams from these cameras are combined by computer and the resulting images reach viewers in a format that will make them feel as if they are flying through the scenes they see.

Eye Vision from Prof.
Takeo Kanade, CMU

Assoc. Prof. Dr. Chutisant Kerdvibulvech

The Matrix

- “Virtualized Reality” www.imdb.com
- People will be able to customize the perspective from which they watch, for example, from that of a particular object.

Assoc. Prof. Dr. Chutisant Kerdvibulvech

New Viewpoint Analysis

Augmented Reality

What is Augmented Reality (AR)?

- A combination of a real scene viewed by a user and a virtual scene generated by a computer that augments the scene with additional information.
- Generates a composite view for the user.

Assoc. Prof. Dr. Chutisant Kerdvibulvech

What is the Goal of AR?

- To enhance a person's performance and perception of the world
- But, what is the ultimate goal?

Augmented reality in urban places: contaminated content and
Assoc. Prof. Dr. Chutisant Kerdvibulvech

Transactions of the Institute of British Geographers, 2012

The Ultimate Goal of AR

- Create a system such that no user CANNOT tell the difference between the real world and the virtual augmentation of it.

Once you point the camera over an image related to Kodak, this image will be transformed into an interactive Live Advertising.

AR in Commerce Geek.com

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Augmented Reality vs. Virtual Reality

Augmented Reality

- System augments the real world scene
- User maintains a sense of presence in real world
- Needs a mechanism to combine virtual and real worlds

Virtual Reality:

- Totally immersive environment
- Visual senses are under control of system

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Miligram's Reality-Virtuality Continuum

Milgram coined the term "Augmented Virtuality" to identify systems which are mostly synthetic with some real world imagery added such as texture mapping video onto virtual objects.

Augmented Reality is closest to the real world because mainly a user is perceiving the real world with just a little computer generated data.

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Combining the Real and Virtual Worlds

We need:

- Precise models
- Locations and optical properties of the viewer (or camera) and the display
- Calibration of all devices
- To combine all local coordinate systems centered on the devices and the objects in the scene in a global coordinate system

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Combining the Real and Virtual Worlds (cont)

- Register models of all 3D objects of interest with their counterparts in the scene
- Track the objects over time when the user moves and interacts with the scene

real world

real world with virtual objects and inter-reflections and virtual shading

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Mixed Reality

- Human pacman: A mobile wide-area entertainment system based on physical, social, and ubiquitous computing

Journal: Personal and Ubiquitous Computing

2004
Dr. Adrian Cheok,
National University of Singapore (NUS)
at Singapore

Broadcast in Discovery Channel

Assoc. Prof. Dr. Chutisant Kerdvibulvech

This image depicts and artist's conception of a mixed reality enhanced book. The reader is able to read the actual book, but simultaneously see three dimensional computer graphics co-located with, and in registration with the book.

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Realistic Merging

Requires:

- Objects to behave in physically plausible manners when manipulated
- Occlusion
- Collision detection
- Shadows

****All of this requires a very detailed description of the physical scene**

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Research Activities

- Develop methods to register the two distinct sets of images and keep them registered in real-time
 - New work in this area has started to use Computer Vision (CV) techniques
- Develop new display technologies for merging the two images

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Performance Issues

Augmented Reality systems are expected:

- To run in real-time so that the user can move around freely in the environment
- Show a properly rendered augmented image

Therefore, two performance criteria are placed on the system:

- Update rate for generating the augmenting image
- Accuracy of the registration of the real and virtual image

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Failures in Registration

Failures in registration due to:

- Noise
 - Position and pose of camera with respect to the real scene
 - Fluctuations of values while the system is running
- Time delays
 - In calculating the camera position
 - In calculating the correct alignment of the graphics camera

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Applications

- Medical
- Military Training
- Hazard Detection
- Engineering Design
- Robotics and Telerobotics
- Training
- Sports
- Tourism
- Video conferencing

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Applications (cont.)

- Entertainment, Computer Games
- Manufacturing, Maintenance, and Repair
- Consumer Design
- Audio
- Education
- Architecture
- Human welfare

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Interactive Digital Multimedia Applications

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Augmented Reality Applications

Sixth Sense

Sixth Sense

- A wearable gestural interface that augments the physical world around us with digital information
- Let us use natural hand gestures to interact with that information
- The SixthSense prototype is comprised of a pocket projector, a mirror and a camera.

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Sixth Sense in 21st Century

TED
TALKS

Dr. Pattie Maes,
Massachusetts Institute of Technology
(MIT), United States

Broadcast in TED

2

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Detail of Sixth Sense

- Sixth Sense allows people to use the internet without a screen or a keyboard
- It can turn any surface into a touch screen
- It is made with store-bought components
- *"The software program processes the video stream data captured by the camera and tracks the locations of the colored markers [that you wear on your fingers] using simple computer-vision techniques" ..from MIT Media Lab*

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Detail of Sixth Sense

- The device recognizes items in stores, and then gathers and projects information about products to the user.
- It also is able to provide quick signals to let users know what the best products are based on their needs."
- Recognize articles in newspapers, retrieve the latest related stories or video from the Internet and then display them on pages for the user
- Say goodbye to your encyclopedia

Assoc. Prof. Dr. Chutisant Kerdvibulvech

Cost of Sixth Sense

- Only \$350 dollars, around 12,000 baht
- From an educator's stand point, this is minimum given the amount of money spent on textbooks, computer labs and LCD projectors.
- For educator's, Sixth Sense would be a way to put technology (literally) into each student's hands, because of its size and its cost.

Assoc. Prof. Dr. Chutisant Kerdvibulvech
