## Smell Communication

A smell-based system called Dollars & Scents inside the entrance to their laboratory at MIT

- The system releases scents and perfumes into the air differently depending on stock market changes.
- Emit a lemon-like fragrance if NASDAQ index is going down, while they emit a rose-like fragrance if the stock market is going up.
- Similarly, they also built an olfaction system, called inStink, for conveying ambient presence and activity awareness for food.
